

## Access to Higher Education Excellence Awards Guidance 2023-24

### Introduction

In recognition of the hard work and commitment of Access to HE Diploma students, Ascentis would like to invite approved centres to nominate learners for the Ascentis Access to HE Excellence Awards. There are two categories, Outstanding Academic Achievement and Outstanding Commitment to Study, which are detailed below.

To be eligible for nomination, a learner is required to have studied on an Ascentis Access to HE Programme in 2023-2024 and meet the criteria for the nominated category.

Each Centre can nominate up to two learners per category per Diploma.

### Prize Categories

#### Outstanding Academic Achievement

Learners in this category should have excelled in their academic study by producing assessed work of an outstanding quality whilst on their Access to HE course. This could include:

- Individual achievement beyond standard expectations
- An outstanding grade profile
- Demonstration of academic skills and techniques beyond what would normally be expected
- Evidenced academic ability likely to result in outstanding achievement in HE

The supporting statement should contain sufficient detail about the range and type of work submitted by the learner and her/his performance with justification for the nomination. Where possible this should include statements made by tutors and references to pieces of assessed work.

Whilst we no longer expect to see evidence of learner work, this may be required for winners in this category to be nominated for the national Keith Fletcher Prize.

#### Outstanding Commitment to Study

Learners in this category will have shown outstanding commitment to their Access to HE studies by evidencing some or all of the following:

- Difficult and challenging personal circumstances
- An inspirational journey which demonstrates the impact of learning
- Clear evidence of extra effort above and beyond that which would normally be required of a learner
- A demonstration of an outstanding level of commitment to study.

The supporting statement should be a detailed explanation of how the learner meets the criteria above. It should give an indication of the types of barriers and challenges the learner has overcome during their course.

NB. Whilst the privacy of the learner should be respected, it will help the panel of judges to assess the nomination if some detail regarding the challenges facing the learner, and the way in which they met these challenges, is provided.
